

Vertical Cartridge Dust Collector

Models from 4 Cartridges to 30 Cartridges

- A self-contained dust collection system
- Ideal for metal working, laser & plasma cutting, grinding, air blasting, welding fume, graphite, pharmaceutical, chemical and other dust extractions
- Excellent permeability filter cartridges
- Exclusive cartridge filter fastening system for easy maintenance

Vertical Cartridge Dust Collector

Product Descriptions:

Vertical cartridge collectors are designed for low airflow and heavy duty extractions. The filter cartridges are fastened on tube sheet by a special level mechanism. The venturi on the top of tube sheet can improve pulse jet clean on cartridge filters. The vertical mounted cartridges avoid possibility of dusts falling from upper filters to down filters, which allows for higher A/C ratio and longer filter life.

Features:

- Suitable for most industrial process dust collections
- Special designed side inlet for heavy dust falls out of the air stream
- Utilize a variety of filter media to provide highest filtration efficiencies
- Suitable for operating at highest air-to-cloth ratio and providing longest filter life
- Cartridges secured and changed out from front access door without need of tools
- Automatic compressed air pulse cleaning is standard
- Centrifugal fan is mounted on top of dust collector
- Solid state sequence timer board
